

LASER LIGHT CROSS-HAIR

Eliminate the guess work

HFE's Cross Hair Laser Lights give out an extremely vibrant light that can be easily seen in normal daylight and under fluorescent factory lights.

The cross hair is large enough to make placement of your materials/components etc a breeze.

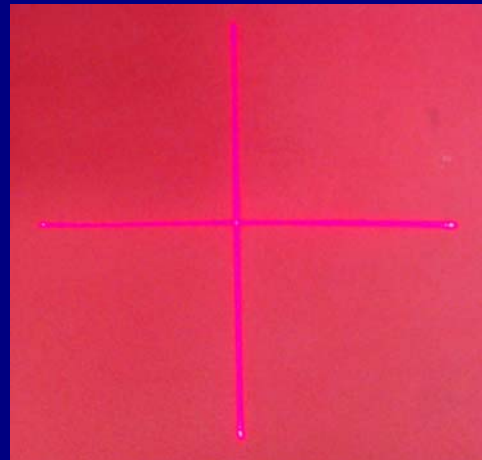

These Laser lights are very affordable. They can increase accuracy, helping to reduce waste.

HFE Lasers can be retro fitted to your machines and are powered by a DC power supply.

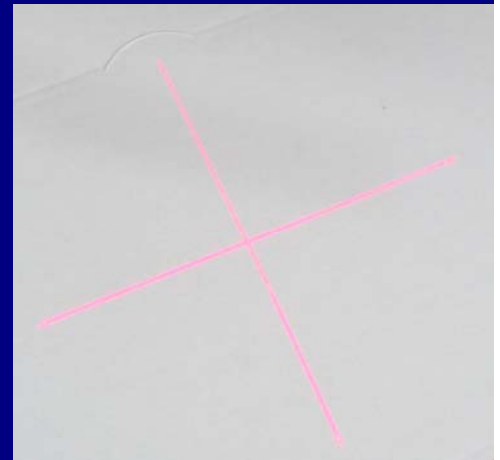

Call now to discuss how this can benefit you.

Blue Barrier Material

Red PVC

White Paper/Cardboard
