MORE FEATURES, MORE POWER, MOST VALUE FOR YOUR BUCK!

Looking to purchase your first top quality computer controlled RF PVC Welder then this is the one for you. The affordability of the 'WELDSTAR' is quite surprising considering it comes packed with features.

Standard features include computer control of the welding process, programmable user channels via interface screen and sophisticated Auto-Power Load Control Technology (APLC).

The Welder is designed for the manufacture of tarpaulins, truck curtains, structural membranes, marques, covers, advertising billboards, shade sails, banners, clear curtains etc.

The WELDSTAR' is available as a Bar welder or a Platen welder for welding patches, re-enforcements, reefers and custom shapes. **Ask about our Soft Bar Technology!**
